## 📁 WORK EXPERIENCE

09/2024  
lagos

### Payfixy

Senior Frontend Engineer

I own the frontend development lifecycle for Payfixy's four core applications, leading technical strategy and execution from conception to deployment.

#### 1. Admin Dashboard: The Operational Nerve Center

- **Role:** Led the development of a complex, data-intensive admin panel used for internal operations and client management.

#### • Achievements:

#### 2. Merchant Application: The Business Partner Portal

- **Role:** Spearheaded the frontend for the self-service merchant portal, empowering businesses to onboard and manage their payment operations independently.

#### • Achievements:

#### 3. Payment Widget: The Revenue-Generating Engine

- **Role:** Owned the development of Payfixy's core, embeddable payment widget—the primary product interfacing with end-customers.

#### • Achievements:

#### 4. Frontend Developer Documentation Portal

- **Role:** Established and maintained the official frontend documentation hub for Payfixy's API and SDKs.

#### • Achievements:

05/2022 – 09/2023
